

IPS Now offers Internet Traffic Monitoring Products

IPS is now offering traffic monitoring software that ranges from checking up on your teen or spouse to corporate upper management wanting to ensure that employees are performing work instead of playing on the internet.

Spector Pro captures and organizes ACTUAL Emails (SMTP and web-based services such as Hotmail), Chat Conversations, and Instant

Messages and includes the best Keystroke Logger available anywhere!

PLUS - built in Intelligence will examine and analyze all PC activity to determine if you should be NOTIFIED IMMEDIATELY.

Awarded PC Magazine Editors' Choice

About.com Awarded 5 out of 5 stars by About.com

eBlaster is the ONLY software that captures their incoming and outgoing emails, chat and instant messages - then IMMEDIATELY forwards them to any email address you choose.

eBlaster also creates an hourly Activity Report detailing all emails sent and received, chats, IM's, keystrokes typed, web sites visited, programs launched and peer-to-peer (P2P) files downloaded - then sends it directly to YOUR email address.

SpectorSoft designs products that allow you to record and view what others do on the computer, and specifically what they do on the Internet. These products are especially popular with people who want to record and monitor their loved ones online activity and for employers who want to reduce inappropriate and non-work related web surfing.
